

T Y P E • A

A gravity wall composed of vertical, or near vertical, reinforcing units. It is utilized where excavation is not necessary or may even be undesirable. Can be permanent or temporary.

Applications:

- Landslide/Slope Stabilization
- Footing Reinforcement/Stabilization
- Ground Support/Strengthening for Tunneling
- Mine Subsidence Repair
- Underpinning
- Permanent Retaining Wall
- Ground Disturbance Control
- Preservation of Natural Areas

INSERT: IN Situ Earth Reinforcement Technique
